

VALVOLE DI ESCLUSIONE ALTA-BASSA PRESSIONE TWO PUMP "HI-LOW" UNLOADING VALVES

SCHEMA IDRAULICO
HYDRAULIC DIAGRAM

IMPIEGO:

In un circuito alimentato da due pompe in parallelo, valvola utilizzata per mandare a scarico la pompa di maggior portata al raggiungimento di un determinato valore di taratura (BP). Da questo momento in poi l'attuatore lavora con la pompa di minor portata a pressione maggiore (AP), consumando meno energia.

USE AND OPERATION:

In a circuit which uses two parallel pumps, this valve unloads the larger pump to tank once the pressure setting of BP has been reached. From this point the circuit will only be supplied by the smaller pump at a higher pressure AP, therefore consuming less energy.

MATERIALI E CARATTERISTICHE:

Corpo: acciaio zincato.
Componenti interni: acciaio temprato termicamente e rettificato.
Guarnizioni: BUNA N standard.
Tenuta: a cono guidato. Trafilamento trascurabile.

MATERIALS AND FEATURES:

Body: zinc-plated steel.
Internal components: grounded and hardened steel.
Seals: BUNA N standard.
Leakage: Guided poppet - negligible leakage.

MONTAGGIO:

Collegare BP alla pompa di maggior portata, AP alla pompa di minor portata, T allo scarico, U all'utilizzo e M all'eventuale manometro.

CONNECTIONS:

Connect BP to the higher flow pump, AP to the lower flow pump, T to the tank, M to the eventual manometer and U to the hydraulic circuit.
